

Handout lab — café & <study>

第二部

Choose one option for each question, then write a response to apply the idea.
Answers are in the separate answer key.

- Literal text & units

Name: _____ Date: _____

1. Choose the literal café label.

<script>window.handoutInjection = 1</script>

- A. Distractor bold
- B. Correct café — 7 μ s
- C. Distractor
- D. Distractor & comparison

APPLY THE IDEA

Copy a literal label, including <angle brackets> & accents.
Explain your choice in your own words.

2. Which mark is the Greek letter beta?

Keep this second question on its own line.

- A. β — beta
- B. B — Latin capital B

APPLY THE IDEA

Write another pair of visually similar symbols.

State which alphabet each belongs to.

3. Read the final option carefully.

This deliberately long fictional prompt checks whether a teacher can print a complete question while preserving every choice. The paragraph includes spaces, punctuation, café, Δ , and 中文. It should wrap on a narrow display and on the printed page without shrinking the text into an unreadable strip or cutting off the last option.

The task is to choose the option containing the exact final marker.

- A. First distractor — not the requested marker.
- B. Second distractor <section>literal text</section>.
- C. Third distractor & a quoted "phrase".
- D. Fourth distractor
with its own second line.
- E. Fifth distractor — a different ending.
- F. FINAL-MARKER-7879 — this exact last option.

APPLY THE IDEA

Describe how you checked the final option.
