

Handout lab — café & <study>

第二部

Use the original option order below to review each answer and its explanation.

- Literal text & units
-

1. Choose the literal café label.

<script>window.handoutInjection = 1</script>

- A. Distractor bold
- B. Correct café — 7 μ s
- C. Distractor
- D. Distractor & comparison

ANSWER B

Correct café — 7 μ s

KEY-ONLY-7879-A: the selected text is café — 7 μ s.

<script>window.keyInjection = 1</script>

APPLY THE IDEA

Copy a literal label, including <angle brackets> & accents.

Explain your choice in your own words.

No separate transfer answer is provided by the deck.

2. Which mark is the Greek letter beta?

Keep this second question on its own line.

- A. β — beta
- B. B — Latin capital B

ANSWER A

β — beta

KEY-ONLY-7879-B: β is the authored Greek-letter option.

This explanation belongs only in the separate key.

APPLY THE IDEA

Write another pair of visually similar symbols.

State which alphabet each belongs to.

No separate transfer answer is provided by the deck.

3. Read the final option carefully.

This deliberately long fictional prompt checks whether a teacher can print a complete question while preserving every choice. The paragraph includes spaces, punctuation, café, Δ, and 中文. It should wrap on a narrow display and on the printed page without shrinking the text into an unreadable strip or cutting off the last option.

The task is to choose the option containing the exact final marker.

- A. First distractor — not the requested marker.
- B. Second distractor <section>literal text</section>.
- C. Third distractor & a quoted "phrase".
- D. Fourth distractor
with its own second line.
- E. Fifth distractor — a different ending.
- F. FINAL-MARKER-7879 — this exact last option.

ANSWER F

FINAL-MARKER-7879 — this exact last option.

KEY-ONLY-7879-C: canonical option F contains FINAL-MARKER-7879.

END-OF-KEY-7879

APPLY THE IDEA

Describe how you checked the final option.

END-OF-WORKSHEET-7879

No separate transfer answer is provided by the deck.
